

Portable Ozone Generator Model NT-BT6G

Applications:

Houses, offices, schools, hospitals, storage facilities, hotels, KTV lounges, cars, farms, food processing plants, cosmetics industries, packing line, domestic swimming pools, domestic waters.

Functions :

1. Eliminate bacteria and viruses.
2. Precipitate heavy metals (example iron and manganese) enabling them to be filtered.
3. Eliminate yellowish colour from water caused by tannin.
4. Neutralizes unwarranted odour caused by hydrogen sulphide in water.
5. Oxidise inorganic and organic matters to form compounds that can be easily flocculated and filtered.
6. Eliminate cooking, pet, garbage, cigarette smoke, mold and mildew, damp carpet odors, etc.
7. Kill bacteria and viruses to keep food fresh for storage.
8. Wash and remove residual pesticides from vegetables and fruits.
9. Disinfection for domestic and public swimming pools.
10. Remove formaldehyde and phenol (fresh paint odour) especially for new houses, hotels and offices, schools etc.
