

Model: IONS 8000

- ▶ Power: 2 watts
- ▶ Voltage supply: 220V/50Hz
- ▶ Negative ion density: 8 million ion/cc
- ▶ Generating head: 4 metal pins
- ▶ Dimension: 130 x 65 x 50mm
- ▶ With negative ion working indicator

What are the benefits of Negative ion to our bodies?

- Improves the body's ability to recover from fatigue or injury
 - Improves vitality and mood
 - Enhances the body's immune system
 - Stabilizes blood pressure
 - Assists in calming and relaxing nerves
 - Improves blood circulation (helps elevate cold hands and feet)
 - Assists in the dilation of blood vessels
 - Increases blood alkalinity and restores pH balance
 - Balances respiration and makes breathing easier
 - Effective in reducing the growth of micro-organisms
-
- Specific studies have shown reduction of free radicals in blood, boosted globulin production (enhancing disease resistance), and increased digestive enzyme flows.
 - Negative ions are nature's therapy, offering breathing stabilisation, boosted heart function, relaxation and promotion of healthy growth, particularly in illness recovery.
 - To address air pollution-related health problems a growing number of people are using personal and home air filtration products that generate negative ions to charge and precipitate airborne particulate matter for removal to create localized zones of improved air quality.
 - Consumer devices that utilize negative ion-generating technology have been shown to eliminate airborne pollutants, dust, cigarette smoke, pet dander, pollen, mold spores, viruses and bacteria from the air. Negative ions have long been attributed to improvements in mood and physical health. Research supports the view that negative ions have a net positive effect on health, including improved mood, stabilized catecholamine regulation and circadian rhythm, enhanced recovery from physical exertion and protection from positive ion-related stress and exhaustion disorders.
